What makes Great Fish & Chips?

Make it Australian

Eating seafood is a healthy and delicious choice for you and your family. Buying Australian seafood supports Australian fishing families and the regional communities they are based in. So whether it's grilled, battered or crumbed, when you eat Aussie seafood you're digging in to the best in the world!

Ask for Aussie Seafood

Australian seafood is one of the most sustainable protein sources in the world. Make a positive choice for the planet and ask for Aussie when you're buying seafood.

Try something new

Australia has plenty of fish in the sea. Each one with its own unique flavour and health benefits. We know you love your Flathead, but why not have a chat to your server about the different types of fish on the menu you can discover? Try asking for an underutilised species like Leather Jacket, or Silver Warehou next time you order Fish & Chips!
